[Machine learning: View Job](#)Avg. 18 ms 95th percentile 99th percentile

Requests per minute

HTTP 2xx 69.7 rpm HTTP 4xx 4.2 rpm

petclinic-spring

Clear spikes but even traffic — what's up?

Drill Down the Traces

Times go up across all the services as you dive deeper

Transaction duration

Machine learning: [View Job](#)

Requests per minute

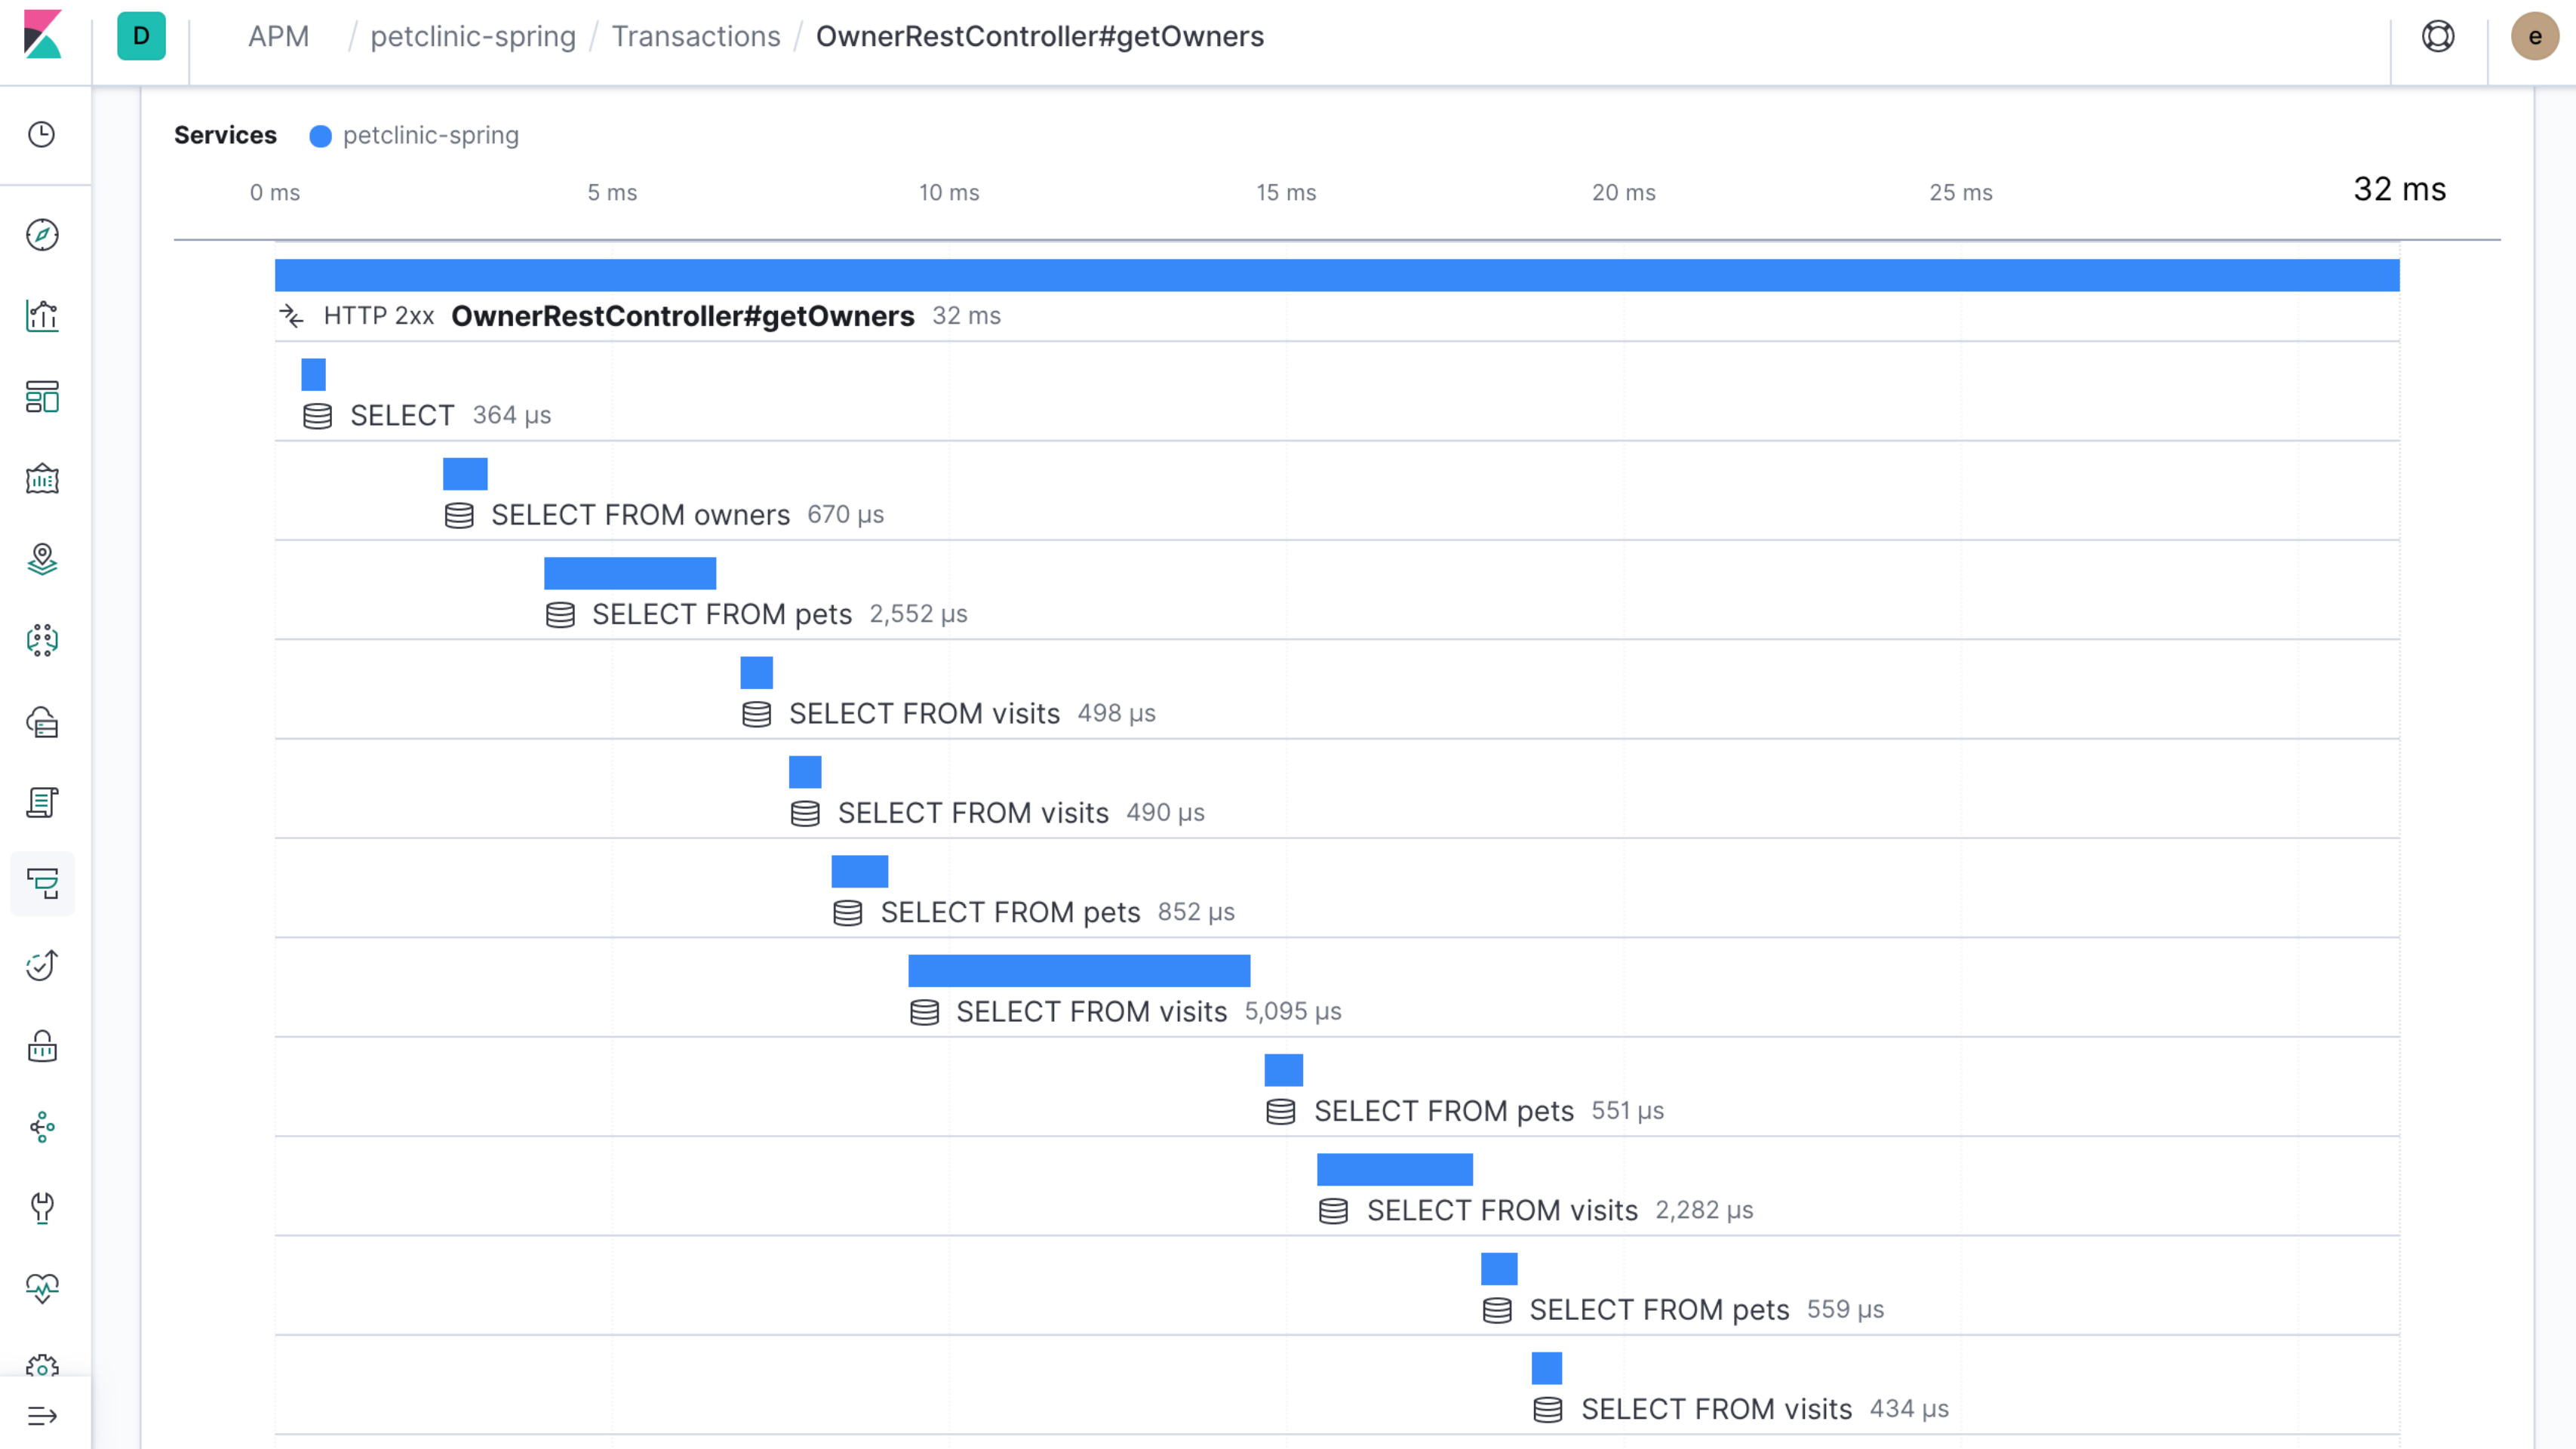

Transactions

Name	Avg. duration	95th percentile	Trans. per minute	Impact ↓
OwnerRestController#updateOwner	1,239 ms	103 ms	0.9 tpm	<div></div>
OwnerRestController#getOwners	25 ms	37 ms	15.4 tpm	<div></div>
OwnerRestController#getOwner	10 ms	15 ms	19.0 tpm	<div></div>
VetRestController#getAllVets	12 ms	19 ms	8.3 tpm	<div></div>
PetRestController#getPets	18 ms	26 ms	3.4 tpm	<div></div>
PetRestController#getPet	9 ms	15 ms	4.9 tpm	<div></div>

Traces

`OwnerRestController#getOwners` has an N+1 problem

But the same for slow and fast requests, so an independent problem

petclinic-node

Same spike for that time, so not a Java problem

"Service Analysis" Dashboard

99th Percentile

Filter to the 99th percentile

`petclinic-node` and `petclinic-spring` are impacted at the same points, but not the React or Python app 🤔

[APM] System Performance

99th Percentile...	203 ms
Number of Trans...	710.4
Average	41 ms
95th Percentile ...	114 ms

[APM] Service Performance ...

Cloudflare Outage Caused by Bad Software Deploy

<https://blog.cloudflare.com/cloudflare-outage/> (2019/07/02)

Unfortunately, one of these rules contained a regular expression that caused CPU to spike to 100% on our machines worldwide. This 100% CPU spike caused the 502 errors that our customers saw. At its worst traffic dropped by 82%.
